The abstract submission and presentation guidelines are crucial for ensuring a fair and standardized evaluation process for award nominations. These guidelines provide a framework for applicants to effectively showcase their work and for selection committees to assess their qualifications. Here are ten comprehensive guidelines to help applicants prepare their abstracts and presentations.

- 1. Word Limit and Biography:** The abstract should not exceed 1000 words, with a minimum of 200 words, while the biography should be within 200 words (minimum 50 words). Adhering to these limits allows for concise yet comprehensive submissions.
- 2. Images and Publications:** Applicants can include a maximum of three images, including their own photography. Additionally, they should provide a list of recent and relevant publications, ranging from a minimum of five to a maximum of 10. These references demonstrate the applicant's knowledge and expertise.
- 3. Abstract Structure and Formatting:** The abstract should be well-structured with clear headings and subheadings, facilitating easy navigation through different sections. Applicants must follow specified formatting guidelines for font size, margins, and spacing to ensure consistency and readability.
- 4. Content Clarity and Objectives:** The abstract should clearly convey the research or project's objectives in a concise and understandable manner. The methodology employed, including any innovative approaches, should be highlighted, and the results presented with relevant data and statistical analysis.
- 5. Significance to the Award:** Applicants must emphasize how their work aligns with the objectives and criteria of the specific award. It is essential to highlight how the research or project addresses the challenges or advancements sought by the awarding organization.
- 6. Language and Style:** The abstract should be written in clear and concise language, avoiding technical jargon that may hinder understanding. Proofreading is crucial to eliminate grammatical and spelling errors, ensuring a polished and professional presentation. Engaging and captivating writing style helps convey the applicant's enthusiasm and passion for their work.
- 7. Presentation Guidelines:** In addition to the abstract, applicants may be required to prepare a presentation that further elaborates on their research or project. Specific guidelines will be provided, including the format (e.g., oral or poster presentation), time limit, and content requirements. The presentation should effectively communicate key findings and implications.
- 8. Review and Evaluation:** An expert panel or jury will review and evaluate the abstracts and presentations based on factors such as scientific rigor, innovation, clarity of communication, and potential for practical applications. The guidelines ensure a consistent and fair evaluation process.

- 9. Conference Presentations:** Successful candidates will be invited to present at respective pre-conferences, Global Tech20 Summits, Pharma20 Summits, G20 Health20 Summits, and other conferences held in major global cities throughout the year. Alternatively, online presentations may be arranged. A registration fee of \$399 USD will be required to cover conference costs.
- 10. Publication and Proceedings:** Accepted presentations will be published in a reputed journal with a nominal publication cost of approximately from \$999 USD to \$1999 USD depending on the journal of publication. This allows for wider dissemination of the research and contributes to the applicant's academic and professional recognition

Abstract Submission and Presentation Guidelines serve as a guiding light, illuminating the path for talented individuals to showcase their brilliance. As they navigate the captivating cities and engage in the exchange of knowledge, these guidelines ensure that excellence prevails, leaving an indelible mark on the global landscape of innovation.

## Be a Part of the Distinguished G20 Community, Showcasing Your Research and Gaining Recognition in Global Conferences and Proceedings

We extend a cordial invitation to scholars, scientists, and physicians to actively participate in an endeavor that holds the potential to shape the future of affordable healthcare and medicine. Your invaluable research can make a remarkable impact in these vital areas.

We invite you to submit your research for presentation and publication in prestigious platforms such as the G20 Affordable and Accessible Healthcare Summit series, Global Tech20 Summits, Pharma20 Summit series working group meetings, Pharma20 Summit series, digital health, and the esteemed G20 conference proceedings publications. By joining this distinguished community, you have the opportunity to earn recognition for your work while contributing to the esteemed G20 proceedings.

We seek research that focuses on promoting affordable and accessible healthcare, accessible medicine, and the practical application of your findings in the domains of science, technology, and medicine. This is an excellent opportunity to present your selected abstracts at the designated G20 conferences or through virtual presentations. Following these presentations, your work will be featured in the renowned G20 conference proceedings publication.

This is an excellent opportunity to present your selected abstracts at the designated G20 conferences or through virtual presentations. Following these presentations, your work will be featured in the renowned G20 conference proceedings publication.

We eagerly anticipate your participation and the valuable insights you will bring to this exceptional platform. Together, we can make significant strides in advancing affordable healthcare and medicine, ensuring their accessibility to all.

**Regardless of Physical Presence, Showcase Your Work and Get Published in the G20 Event Series Proceedings, Available in Global 20 Languages**

In the event that unforeseen circumstances prevent your physical presence at these events, we are pleased to offer a virtual presentation opportunity, ensuring that your work is still showcased.
